

Cyber Industries
Building a Culture of Security

Building a Culture of Cyber Security

We live in an era where connection is power, but also fragility, where security is not just defense, but an act of trust between humans and technology.

It is in this space that Cyber Industries is building the future of cybersecurity: human, aware, resilient.

About Cyber Industries

Building the future of cybersecurity: human, aware, and resilient.

Experience

Over 23 years of unparalleled expertise in the cybersecurity field.

International Certifications

18 international certifications.

Global Awards

9 global awards.

Training Courses

Over 160 certified training courses in Cyber Security.

Cyber Industries
Building a Culture Of Security

A detailed image of a metallic, oval-shaped shield with a central circular boss and rivets along its edge. The shield is positioned diagonally, and it is being pelted with numerous red arrows from all directions. The arrows are in motion, creating a sense of intense attack. The background is dark and textured.

Cyber Industries
Building a Culture of Security

Introducing Real Data Breach Simulation

Our proprietary approach replicates real-world breach scenarios in controlled environments, giving leadership clear visibility into security effectiveness and actionable insights to strengthen resilience

Data Breach Simulation Goals

Assessing your organization's security posture

System Takeover

Tests the ability to compromise internal systems remotely, simulating phishing attacks and establishing an initial foothold.

Data Exfiltration

Evaluates the success of an attacker in extracting sensitive data without detection.

Ransomware Impact

Assesses the potential for data unavailability through simulated ransomware attacks and identifies business disruption.

Unparalleled Success Rate & Methodology

- **Guaranteed 99% Success Rate:** Our proprietary tool, unique globally, achieves a 99% success rate in simulation objectives when tested against leading security platforms (EDR, XDR, SOC, MDR).
- **Novel Attack Vector Methodology:** We simulate a criminal hacker using novel attack vectors unknown to global threat intelligence. This approach effectively bypasses current defense systems that focus on known threats.

The Value of Our Simulation Report

Crucial, strategic information for configuring your IT infrastructure.

Guidance on Managing Unknown Attacks

Provides actionable advice for handling unforeseen cyber threats.

Strategies to Reduce Cyber Risk

Offers methods to significantly decrease your organization's exposure to cyber threats.

Assessment of Protection Systems

Evaluates the effectiveness and configuration of your current security measures.

Beyond Traditional Penetration Testing

Achieve Unmatched Security Insight

Traditional Penetration Tests

Focus on exploiting known vulnerabilities in individual systems.

Our Integrated Simulation

Leverages inherent integration features between OS, applications, and security systems.

Unmatched Security Insight

Bypasses conventional defenses to reveal true resilience.

Novel Threat Testing

Assesses your posture against sophisticated, interconnected threats.

How the Simulation Works

Key Features

A Unique Innovation in Cybersecurity

- **Real Data Breach Simulation:** Our unique offering designed to reveal your true security risks.
- **Expert Development:** Crafted by highly competent and certified cybersecurity professionals.
- **Empowering Insight:** Experience firsthand what a hacker can achieve when bypassing your current defenses.
- **Understand Your True Risks:** Gain unparalleled clarity on your vulnerabilities and potential impact.

SWOT Analysis: Real Data Breach Simulator

Evaluating the strengths, weaknesses, opportunities, and threats of our unique security tool.

Strengths

Unique proprietary tool: World-first, bypasses advanced security systems (EDR/XDR/SOC/MDR).

High success rate: 99% effectiveness in demonstrating breach scenarios.

Novel attack vectors: Utilizes unknown techniques, rendering traditional defenses obsolete.

Realistic simulation: Mimics real hacker actions from internal endpoints.

Expert development: Created by highly competent and certified cybersecurity professionals.

S

Weaknesses

Client education required: Novelty may necessitate understanding of the methodology.

Remediation dependency: Success hinges on client's ability to act on report findings.

Potential for misinterpretation: Risk of clients focusing on tool success vs. underlying vulnerabilities.

W

Opportunities

Growing market demand: Increasing need for advanced, realistic security validation.

Strategic partnerships: Collaborate with IT service providers and MSSPs.

Service expansion: Develop complementary services based on unique capabilities.

Compliance enhancement: Aid organizations in meeting stringent security standards.

O

T

Threats

Evolving defenses: Adversaries may develop countermeasures to bypass techniques.

Competitive innovation: Competitors may develop similar bypass methods.

Potential misuse: Risk of techniques being exploited if compromised.

Market saturation: Increased adoption could lead to more competition.

Target Market

- **Critical Data Management**
Organizations managing sensitive information like financial institutions, healthcare providers, government agencies, and technology firms.
- **High Regulatory Scrutiny**
Industries facing stringent compliance requirements such as GDPR, HIPAA, NIS2, DORA, PCI DSS.
- **Significant Cybersecurity Investment**
Companies with existing advanced security solutions (EDR, XDR, SOC, MDR) seeking to validate their effectiveness.
- **Concerned about Sophisticated Attacks**
Organizations fearing advanced persistent threats (APTs) and zero-day exploits, understanding limitations of traditional measures.

We focus on mid-to-large enterprises where the impact and cost of a data breach are substantial, making proactive, advanced validation essential.

How We Make Money & Growth Potential

Revenue Streams

- **Real Data Breach Simulation Service:** Direct sales of our unique, high-fidelity breach simulation service. Offering tiered packages based on scope and duration.
- **Consulting & Advisory:** Post-simulation strategic consulting to help clients implement findings and reduce risk.
- **Managed Security Services:** Potential future offering for continuous monitoring and response based on simulation insights.

Market Opportunity & Growth

- **Vast & Growing Market:** The global cybersecurity market is projected to reach over \$300 billion by 2027, with a significant demand for advanced breach simulation.
- **Unique Selling Proposition:** Our proprietary tool bypasses all current security software, offering unparalleled insight into real-world threats, a key differentiator.
- **Scalable Model:** Our service is designed for scalability, targeting enterprises, mid-market companies, and government agencies.
- **International Expansion:** Planned expansion into key international markets to capitalize on global demand for advanced cyber resilience.

Our Commitment to Security Across Sectors

Trusted by Industry Leaders

Cyber Industries provides cutting-edge, human-aware cybersecurity solutions trusted across diverse and demanding sectors.

Our Clients Include:

- **Aerospace & Defense:** Ensuring the integrity of sensitive data and critical systems.
- **Maritime & Logistics:** Protecting vital infrastructure and global supply chains.
- **Hospitality:** Safeguarding customer data and maintaining brand trust.
- **Global Consulting Firms:** Securing complex client information across industries.

This breadth of experience demonstrates our ability to adapt and excel in any environment, providing unparalleled expertise to meet your unique security challenges.

Cyber Industries
Building a Culture of Security

Competitive Advantage

Cyber Industries redefines value in cybersecurity by offering **globally competitive pricing** without compromising on service excellence.

- **Superior Quality, Smarter Price:** Experience cutting-edge cyber security services at a cost significantly lower than comparable global offerings.
- **Strategic:** Our pricing reflects our commitment to **Investment, Not Just an Expense** making advanced, human-aware cybersecurity accessible, ensuring you receive unparalleled insights and risk reduction.
- **Maximize ROI:** Achieve maximum security posture improvement and risk mitigation with a service that delivers exceptional results at an effective price point.

Maximize ROI with superior cybersecurity at exceptional value.

Why Partner With Us?

Partner with Cyber Industries

Choose Cyber Industries to fortify your defenses against the evolving landscape of cyber threats.

We provide the clarity and strategic insights needed to build a truly resilient and human-aware cybersecurity posture.
